

KITTEN MEMBERSHIP

(Younger than 1 year)

WINTER 2022

\$399.99
+ HST

As a member, you'll gain access to exclusive membership pricing. These budget-friendly options promote early diagnosis and treatment, helping your kitten stay healthy and happy during the first year of their life.

KITTEN VACCINE EXAMS | \$0.00 *Reg. \$96.01*

FREE

Kittens require multiple vet visits in their first several months in order to receive the necessary vaccines and to ensure they are developing properly. With a membership, the cost to see a veterinarian at these visits is free. At your first appointment, your veterinarian will work with you to identify which vaccines your little one should receive based on their lifestyle and health factors. Your kitten will then get started on a vaccine schedule to start building immunity and keep them healthy and safe from disease.

VACCINATIONS | \$13.65 Per Vaccine *Reg. \$27.30*

SAVE
50%

The exact number of vaccinations recommended for your kitten will depend on their lifestyle. However, in order to start their life with optimal immunity to the most common diseases, most cats require vaccines at around 8, 12, and 16 weeks of age. At each visit, one or two vaccines are usually administered.

ADDITIONAL EXAMINATIONS | \$48.00 *Reg. \$96.01*

SAVE
50%

Your kitten will likely require several vet visits during their first year of life, whether for routine care, minor injuries, or other concerns. This membership gives you peace of mind knowing that you can call and book your little one in for a doctor's assessment at any time during the year for half of the regular price.

SPAY OR NEUTER | \$194.93 *Reg. \$389.86*

SAVE
50%

Your kitten's spay or neuter will include: pre-anesthetic surgical examination, fluid treatment and pre-surgical medication along with "human standard" surgical protocols, full technician monitoring (ECG, blood pressure, O₂ saturation & temperature), and take-home pain medications.

SURGICAL SAFETY BLOOD WORK | \$123.69 *Reg. \$247.39*

SAVE
50%

Before your cat's spay or neuter, we will recommend a basic blood profile that allows our team to identify and plan for risk factors that may affect their surgery, anesthesia, and recovery. This blood work also establishes a baseline to be used for comparison in the future if your cat ever becomes ill.

NAIL TRIMS | \$11.06 *Reg. \$22.11*

SAVE
50%

Keeping your cat's nails trimmed short can reduce the damage to your furniture as well as protect them from having their nails grow into the pads of their paws. Regular nail trims with lots of love and treats help to form a positive association with the process, and encourages good foot health.

FELINE VIRAL 2 TEST | \$55.05 *Reg. \$110.10*

SAVE
50%

A Feline Viral 2 Test or 'FeLV/FIV' blood test screens for two viruses that are commonly transmitted by cats and carried for life: feline immunodeficiency and feline leukemia. Both viruses cause a weakened immune system and a higher risk of getting sick. Testing is important, especially in multi-cat households, so measures can be taken to reduce the risk of illness and transmission.
